Muhammad USAMA FIAZ

Educational Background:

- Matric (Science)
- Intermediate (ICS)
- Bachelor(Software Engineering)

I have also complete some courses Like Agile Methodology , SCRUM , Waterfall Model , Advance Javascript , HTML CSS and Bootstrap 4 from online universities.

Work History

- I have started my career as an PHP Backend Developer. Later on I have learn MVC Frameworks Codeignater and Laravel .
- Cooperate with front-end developers and other team members to design more cohesive and functional code.
- Create web applications , admin panels , e-commerce sites and LMS using Object Oriented Approach.
- Managed user authentication and authorization for servers and various environments.
- Designed, developed database with DBMS rule.
- Create and implement database designs ,data models and migrations.

WORK EXPERIENCE

I have 3 years of experience in software houses. I have completed several projects from overseas clients. Out Of many Projects I am going to share you important ones.

Connect Social:

Connect Social is a new and exciting Social Economy that is unique because it rewards consumers for their data while allowing Merchants to purchase VERIFIED Consumer data. This makes us stand apart from other big tech companies, who provide neither. Connect Social's consumers are part of a social network, similar to Facebook, which allows them to shop at merchants, similar to Amazon.

Soilexperts.us :

SoilExperts Pvt Limited is using cutting-edge technology to improve fertilizer in Pakistan. Soilexperts research lead by the team of scientists in Boston.I have Made Soilexpert in PHP for backend and JavaScript ,HTML, CSS for Frontend.

University Management System for (FJWU)

I have develop as well as lead team to made 4 modules JOB PORTAL, HUMAN RESOURCE , ATTENDANCE . and FINANCE. These Modules are made with MVC framework
